**Perspective of Happiness**
What exactly is "happiness"? How do the great philosophers and psychologists envision it? Are we born with a fixed amount of it, due to our genetic makeup? Or are we able to change ourselves somehow and become happier? And can we measure how happy or satisfied people are? These are some of the questions we will ask while examining the work of philosophers and psychologists from both East and West who have exerted great influence on perceptions of happiness. In doing so, we will conduct not only intercultural comparisons, but comparisons between the intuitive, experience-based ideas of the philosophers and the more empirically based ideas of modern psychologists.
