IDEAL PROGRAM COURSE SYLLABUS

Dear Student.

Please read the following course syllabus carefully, especially the course dates, times and location. If you have any questions, please do not hesitate to communicate with the IDEAL office, your academic advisor, or the instructor.

The IDEAL degree-completion program is designed with the adult learner in mind. Adult learners approach learning with specific goals, want to be able to directly apply new learning to their work and personal lives, and tend to learn best when the coursework is problem-centered so that they are actively engaged in the learning process. In addition, adults bring rich and varied experience to the classroom, which becomes a valuable learning resource for other students.

The IDEAL Program assumes joint responsibility in the learning process. The activities and assignments in our classes build on the shared experience of all learners in each class. This is why each student's preparation, participation and interaction in class activities and discussions are critical to the success of each course. The accelerated format of each course requires a significant amount of time outside the classroom to prepare for and complete the course assignments. This varies between students and courses; however, students typically spend a minimum of ten-twelve hours per week on course material.

To participate in the IDEAL Program, it is expected that you will do the following:

- 1. Attend every class session. Be on time.
- 2. Obtain the required course materials prior to the first class session.
- 3. Complete the first assignment prior to the first class session and all subsequent assignments to the best of your ability.
- 4. Participate in the class discussions and demonstrate respect and consideration to the instructor and other students when they express themselves in discussion.

If you cannot perform these four expectations, it is recommended that you drop the course.

Missing one class session will drop the final grade by one letter grade (for example if the student earned a grade of "B" in the course, the final grade would be a "C"). If a student misses two or more classes a grade of F will be entered as their final grade.

Cheating and Plagiarism

It is the student's responsibility to become familiar with and adhere to the standards set forth in the policies on cheating and plagiarism as defined in Chapters 2 and 5 of the Key to UB http://www.bridgeport.edu/pages/2623.asp or the appropriate graduate program handbook

E-mail correspondence

It is imperative that you check your UB e-mail on a regular basis. All written correspondence, to include IDEAL and the University will be sent to you through his e-mail. The University can no longer correspond to your personal e-mail account(s).

Ethics Statement of Confidentiality

An integral component of an IDEAL course is student and faculty expression of personal experiences for the purpose of facilitating coursework. Students enrolled in the program are expected to honor confidentiality as it pertains to student disclosure. Shared information, comments, or opinions expressed by another student or the faculty member during the course of classroom discussion should never be used in a manner which is intended to humiliate, embarrass, harass, damage, or otherwise injure other students in their personal, public, or business lives. In addition, confidentiality must be upheld by not disclosing any information that would identify any particular individual.

The IDEAL Program

STUDENT'S RESPONSIBILITIES:

- 1. To have internet access.
- 2. To have a Bridgeport Username and password to access the Canvas and emails regarding this class. Please make sure that everything is set up and tested before the first class.
- 3. To check emails regularly for class assignments and updates.
- 4. To read the assigned chapters before the date that they are scheduled to be discussed in class.
- 5. To deliver the assignments on time. Assignments should be emailed to the instructor by 6pm on the due date. Late assignments will not be accepted.
- 6. To do the assignments ahead of the due date so that any encountered problems can be fixed.
- 7. To ask for help and clarifications.
- 8. To keep track of which assignments are due and whether or not they have been handed in.
- 9. To avoid behaviors that can be distracting in the classroom.
- 10. It is the student's responsibility to familiarize himself/ herself with, and adhere to, the standards set forth in the policies on cheating and plagiarism as defined in Chapters 2 and 5 of the Key to UB, or the appropriate graduate program handbook.

Course: SCI C102 ID8W2 Humans & the Environment

Day: Thursdays

Dates: 5/9/13 – 6/27/13

Time: 6p-9p

Campus: Bridgeport

Instructor: Janice LaPlante, Ph.D.

jlaplant@bridgeport.edu

<u>Office hours:</u> by appointment. Phone calls will be available by appointment- and can be pre-arranged by email.

<u>Text book:</u> "Human Biology" by Mader ISBN 9780073525488 13th edition McGraw-Hill Publishers

The 11th or 12th Editions of the book are acceptable, and may be available at a lower cost.

Students should order the book NOW because the bookstore always sells out early and there are ALWAYS delays when ordering online, sometimes 2 weeks or more after the promised delivery date. We will be using the book heavily, including an open book test after the first week of class. The students who fall behind are almost always the ones who failed to purchase the book on time.

Course Description

This course is designed to help students gain knowledge of the fundamental elements of life science, beginning with the basic building blocks of life, and how they are assembled to form the living organism. We will discuss the function of some of the key organ systems, and how their malfunction leads to disease. Throughout the course we will consider the interplay between the human organism and his environment. Finally we will discuss the critical issues of environmental biology and the ecosystem.

Learning Outcomes

At the end of this semester, students should be able to:

- 1. Demonstrate a sound understanding of how scientists work (the Scientific Method).
- 2. Describe the basic chemistry of life and the structure and function of the cell.
- 3. Identify the basic structure and function of the selected organ systems of the human body.
- 4. Explain the causes and prevention of diseases common to the organ systems and apply the knowledge gained to the protection of their own body.
- 5. Acquire new insight about their lives and health in relation to the environment in which they live.
- 6. Learn how to navigate the internet to critically investigate emerging topics of interest in the life sciences.

EVALUATION:

1. a. 7 quizzes, (given after weeks 1, 2,3,4,5, 6, and 7). These will be take home tests, open book. You can use the textbook, notes and lecture slides, but you will not be allowed to collaborate with other students. The lowest score will be dropped.

Grading: each @ 8% of total grade. $(6 \times 8 = 48\%)$.

- b. Research paper with presentation @ 24% of grade; (Week 7)
- c. Homework, virtual labs and discussions on Canvas @ 18% of grade
- 2. Class attendance/participation/behavior/professionalism @ 10% of grade. Points will be deducted for chronically arriving late or leaving early or without permission, disrespectful or unprofessional behavior such as gossip, backbiting, intimidation or otherwise generating a hostile atmosphere, failing to contribute on a regular basis to in class discussions, failing to bring textbook to class, etc.
- 3. Extra credit: Optional small projects-details to follow, up to 10 pts (10%) allowed per student.

Reading must be completed before each class in order to provide the background needed for the lecture and discussion. Students must bring their book to the first class, and it is recommended that they bring it to every subsequent class because we will be using it for open book quizzes and in class discussions. No excuses for not purchasing the book!

In Class Workshops/Homework Assignments: The textbook gives an overview of human biology, including the organization and function of molecules and cells, and how they interact to form our organ systems. The homework assignments are designed connect the basic information in the textbook to life science themes that we encounter in our everyday lives. Some of these will be tied into the in-class workshops. The format of the assignments will range from readings/worksheets, to Virtual Labs, to online discussions on Canvas. Each of these is designed to tie the content of the lesson to real life issues that are both interesting and relevant to the student. The Virtual Labs are exercises designed to make the student think like a scientist to solve the type of problems that a working scientist might encounter. The readings/worksheets include material about disease or scientific issues of interest to you as a member of the community. The Online Canvas Discussions are, by nature interactive, and each student will have the opportunity to create and moderate his own discussions based upon his own interests. In general, each student will need to provide a well thought out, original answer to the main question by the Friday following the class, and will be required to add comments to the discussions started by at least four of his fellow students. More is always welcome. All of these homework assignments are tied in with the current course material. Therefore late assignments will receive a substantial deduction in the grade.

Research Paper: This project will be set up as a full semester workshop with small assignments to be completed every week. The goal of the project will be to develop the ability and confidence to navigate science as a layperson in your community. There will

be times in your life when you need to learn more about a family illness, to participate in policy making on your job, or to understand an urgent situation in the world. As a starting point, you need to familiar with the basic concepts and vocabulary of health, life science and the environment. For this workshop, you will learn how to research topics of interest on the internet as a lay person, and to discern trusted sources of information from questionable sources. The small weekly assignments will build up to a final paper: to describe current research in the news, related to a very specific topic. You will need to identify a topic that interests you, describe the background in the field, point out a question that needs to be addressed, a hypothesis being pursued, and describe at least one research study that has been recently been published to address that hypothesis. In addition to the paper, you will give a short in class presentation to share your findings with the class.

The article should be approximately 1000 words and have the format of an article that you might find in the Science section of a newspaper. A detailed explanation along with an example of a great paper written by another IDEAL student, will be provided.

Syllabus updates: The schedule below is subject to change. Because the textbook is rather broad, in many cases, the reading assignments will be narrowed to specific sections of the chapter. When a new version of the Syllabus is placed on the Canvas, the change will be noted on the Announcement Page, so check for the latest version before reading.

CI-C102 LECTURE SCHEDULE – Summer 2013

LaPlante

Assignment to be completed **Before the first class**:

- a. Familiarize yourself with the text book for 1st class.
- b. The textbook has a great companion website. Please familiarize yourself with the website for the 1st class:

http://highered.mcgraw-hill.com/sites/0073525464/information_center_view0/Go to Online Learning Center on left side- Click "Student Edition"

c. We will be relying heavily on the course Canvas throughout the semester. In order to become comfortable with the site you will need to practice navigating around it. This site will be available at least one week before the first class.

Canvas Tutorial: Assignment to be completed during the week <u>Before the first class</u> unless otherwise noted:

You can find the tutorial by going to the Assignment for Week #1 folder, open the link in Lime Green lettering to find the Assignment List. The Canvas Tutorial can be found in Part 1.

d. There will a Research Report/Presentation in the class on any scientific topic of current interest in the media. So start thinking about the topic for your Research Report.

DATE

TOPIC

PART I

WEEKS 1-3: THE INFRASTRUCTURE OF LIFE CHAPTERS 1-3, excerpts from 18 and 21

In Part 1 of the course we will look at the approach that scientists take in studying life science. We will learn about the building blocks of life and how they self-assemble to create the smallest functional unit of life- the cell.

Session 1

May 9th **Topic: Exploring Life and Science**

Prior to class Read the following:

Chapter 1 Exploring Life and Sciences

Reading should be completed before each class in order to provide the background needed for the lecture and discussion. Students must bring their book to the first class. No excuses will be tolerated for not purchasing the book!

Assignment: After class Login to Canvas for **Quiz #1** and details for Online Homework Discussion.

Session 2

May 16th

Topic: Molecules of Life

Prior to class Read the following:

Chapter 2 Chemistry of Life

Assignment: After class Login to Canvas for **Quiz #2** and details for Homework Assignment

Session 3

May 23rd

Topic: Cell- the structural and functional unit of all living things

Prior to class Read the following:

Chapter 3 Cell Structure and Function

Chapter 18 (Sections 18-1-18-3) – The Cell Cycle Chapter 21 (Sections 21.1-21.2) – DNA Biology **Assignment:** After class Login to Canvas for **Quiz #3** and details for Homework Assignment

PART II

WEEKS 4-7 ORGANIZATION AND FUNCTION OF THE TISSUES

In Part II we will look at several of the organ systems in the human body as models for how cells are organized into tissues, how tissues are organized into organs, how organs work together within an organ system, and how the organ system acts as a machine to perform a set of critical functions with the human body. We will then discuss how the breakdown of that organ system leads to disease.

Session 4

May 30th **Topic: Digestive system, nutrition and related diseases**

Prior to class Read the following:

Chapter 8 - Digestive System and Nutrition

Assignment: After class Login to Canvas for **Quiz #4** and details for Homework Assignment

Session 5

June 6th Topic: Development and Aging

Prior to class Read the following: Chapter 17 Development and Aging

Assignment: After class Login to Canvas for **Quiz #5** and details for Homework Assignment

By June 6th you should have your paper well thought-out, with the hypothesis and outline in place and at least 4 high quality references identified. You should be ready to discuss your project one-on-one with the professor and with other members of your small discussion groups for feedback and ideas.

Session 6

June 13th **Topic: Cancer**

Prior to class Read the following:

Chapter 19 Cancer

Assignment: After class Login to Canvas for **Quiz #5** . Complete Research Papers, prepare Presentations.

a. Draft Report should be uploaded to your TurnItIn.com account (Plagerism Detection Software), due 6pm June 13th. This MUST be uploaded in one of the following formats: MS Word, WordPerfect, PostScript, PDF, HTML, RTF or Plain Text. You will be provided with the Login information for your TurnItIn.com account.

b. PowerPoint file with 3-5 slides should be emailed by Wednesday noon, June 19th.

c. Final Report must be uploaded by Monday, June 24th.

Session 7 June 20th

Topic: Immune system, Infectious disease

Prior to class Read the following:

Chapter 7 **Plus:** Infectious Disease Supplement (This supplement is not available in the 11th edition, so it will be the responsibility of the student to obtain access to the 13th Edition of the textbook for this chapter)

Topic: Begin In Class Presentations

In class Presentations should be 5 minutes long, with 5 minutes for discussion – 10 minutes total. Special accommodations will be made for private presentations, if necessary.

Prior to class:

Upload your PowerPoint presentation, as described above.

Assignment: After class Login to Canvas for **Quiz #7** and details for Homework Assignment. Final Report must be uploaded by Monday, June 24th.

Session 8

June 27th

Topic- In-class presentations – we will finish up with the presentations, followed by an open forum for discussion.

ACADEMIC POLICIES

Attendance Policy

Classroom attendance is an integral part of the academic experience; therefore, students are expected to attend all class sessions. If an absence is unavoidable, the student, prior to class, should advise the instructor. Arrangements should be made at that time for additional assignments if appropriate. It is also expected that students arrive on time and not leave until the class is dismissed. Tardiness will result in a reduced grade for the course. If you cannot attend every class session you should consider dropping the course.

IMPORTANT:

- Missing one class session will drop the final grade by one letter grade (for example if the student earned a grade of "B" in the course, the final grade would be a "C").
- Missing two or more class sessions will be cause for a failing grade.

Incomplete grade

An incomplete <u>may be</u> given, at the discretion of the instructor, to those students who fail to complete assignments due the <u>last day</u> of your course. These would include absence from a final examination or inability to complete terminal assignments (papers, presentations) due to illness, employment conflicts, etc.

Incompletes <u>will not</u> be given to a student who fails to complete any assignment during the term. At the discretion of the instructor, these assignments could be completed no later than the last scheduled day of your class.

Drop Procedures

To drop a course, you must complete and submit a Schedule Change Request Form. The form can be accessed at the following web page:

http://www.bridgeport.edu/pages/2595.asp

Starting Fall 2012

- Add and/or Drop a course after the start date.....\$30.00 per transaction

- Drop prior to the third class session......50% Tuition Refund

**Please note students <u>will not be</u> automatically dropped for missing the first class. Missing one class session will drop the final grade by one letter grade. If you have to miss the first class, or the first week of class for online classes, *you must contact your instructor* in writing before or after the first class/first week. However, a grade reduction will apply.

Please print and complete the form and fax the form to the IDEAL Office: 203-576-4537. Prior to dropping a course, the student should contact their IDEAL Academic Advisor to understand the implications to financial aid and/or degree plan progress.

Please review the Academic Calendar to see the fees for a drop and the impact on tuition. The Academic Calendar can be found at: http://www.bridgeport.edu/pages/2595.asp

Cell Phones

Cell phones must be turned off while in the classroom. A cell phone call is disruptive and disrespectful to the other students in the class.

Academic Dishonesty

We are committed to intellectual integrity in our academic pursuits; therefore, the IDEAL program prohibits all forms of academic dishonesty. Academic dishonesty is normally defined as, but not limited to, the following two categories:

Cheating – Using inappropriate sources of information in an assignment or on a test. The following are examples of cheating taken from real student experiences:

Case #1: A student is enrolled in an introductory computer-programming course. He has co-workers who program in the same language as his final project. As the end of the term approaches, he wonders how he will find the time to get the project finished, and asks one of his co-workers for help. His co-worker hands him a disk with a complete program similar to the kind required for the course project. The student makes minor modifications to the program, and submits it under his own name.

Case #2: A student enrolled in a religious studies course has never taken a humanities or history course, and is unsure about how to structure a research paper. She is doing research on the World Wide Web, and comes across a paper written by a student from another university. Using her computer mouse, she copies and pastes the document into her word processor. She goes to great lengths to re-word the paper in her own style, but essentially leaves the content and organization the same.

Plagiarism – Intentional as well as unintentional failure to acknowledge sources as well as the use of commercially available so-called "research papers" without full recognition of the source. Presenting as one's own, the ideas, words, or products of another. The following are examples of plagiarism taken from real student experiences:

Case #3: A student is conducting research for a Civil War research paper. He has reviewed work on the Internet as well as in the library. Finding helpful information, he has summarized his findings without citing his sources. He believes that minor paraphrasing is all that is necessary.

Case #4: A student is writing a paper that requires her to address specific topics and problems in the assigned course textbook. She takes the information directly from the textbook with slight modification, without giving any citation. She thinks that since it is the course textbook, she doesn't have to use quotations or citations.

Academic dishonesty applies to all courses, assignments or exams completed by students and submitted as their own original work, whether in person or by electronic means. The University does not tolerate cheating in any form. It is a serious breach of conduct with serious consequences. Instructors have the right to determine the appropriate penalty for academic dishonesty in their own classes; generally, however, such acts will result in a failing grade for the assignment and/or the course. The penalty for subsequent acts of academic dishonesty may include expulsion.

More information on how to recognize plagiarism can be found at this site: http://www.indiana.edu/~istd/plagiarism_test.html

ACADEMIC RESOURCE CENTER

The Academic Resource Center is available for IDEAL students seeking help in their studies. The Center is staffed by writing professionals and peer tutors. More information can be found at: http://myub.bridgeport.edu/academics/academicrescenter/Pages/default.aspx The Center is located in the Wahlstrom Library, Room 506. Hours of operation are Mondays –Thursday 9am – 6pm and Fridays 9am – 1pm. Make an appointment or walk-in: Telephone: 203-576-4290.

Online Tutoring is available at: www.etutoring.org. To use this free service you must have a UBNet account.

Obtaining a UBNet Account

Every registered student should obtain a UBNet Account. The account allows you to access your grades, access library services, access online tutoring, access the computers in computer labs, and provides an email account in which the University sends out information. Go to: http://www.bridgeport.edu/ubnet - Click on "New UBNet Account" and follow the instructions.

The @bridgeport.edu email address is the official email the University uses to send information to you. You can have your Bridgeport.edu email forwarded to any other email account you use. Following the activation of your UBNet account (takes 24 hours), login at: http://www.bridgeport.edu/email and click on "forwards" at the top of the page. Follow the directions to forward email messages to your other account.

Accessing Your Grades & Schedule Online

The WebAdvisor online information system allows students to search for available classes, check grades, view semester class schedule and verify your personal profile. Grades are generally posted 2-3 weeks following the end of a course. Information on WebAdvisor is password protected and requires you to use your UBNet username and password. To access WebAdvisor, go to: http://www.bridgeport.edu/webadvisor

- 1. Login in with your UBNet username and password.
- 2. Click on "Student Menu."
- 3. Click on "My Grades."

If you are carrying a financial balance, access to WebAdvisor will be restricted.

Using the Library

You can access the library through the library's website: http://www.bridgeport.edu/library. Research tools available:

- Search for books held at the library.
- Search the online databases for your academic field; business, counseling, human services, psychology, etc.
- Send questions to the Reference Librarian for assistance in research topics and searching strategy.

To access the online journals for research purposes, you will need a UBNet account (see above).

Using Computers

Open access computer labs are available at three campuses:

■ Bridgeport – 1st floor of the Wahlstrom library. Check library hours of operation at: http://www.bridgeport.edu/library.

- Stamford Room D; Check open hours at: http://www.bridgeport.edu/stamford
- Waterbury Computer Lab; Check open hours at: http://www.bridgeport.edu/waterbury

Course Cancellations/ Weather Policy

Any emergency necessitating the canceling of courses will be announced by the University through the Emergency Notification Telephone Line, (203) 576-4159. Please call this number for information on course cancellations. Also, information will be posted under "Latest News" on the UB home page, (www.bridgeport.edu). Canceled classes will be made up either the week following the end of the course or in consultation between the instructor and the students as to day and time availability. Course cancellations are also announced on television and radio stations.

Please note each campus makes weather cancellations independently. You should always check with the specific campus staff. It is best to call the campus emergency phone.

Bridgeport – 203-576-4159
