Physician Assistant Institute

Direct Patient Care Experience FAQ

The University of Bridgeport Physician Assistant Program requires a minimum of **1000 hours of Direct Patient Care Experience**. For experience to be considered “Direct Patient Care”, it must involve hands-on contact with patients and/or high-level decision making in a medical environment. These experiences may be paid or volunteer. The PA Program faculty/Admissions committee will review all duties listed, therefore please be as specific as possible when documenting your responsibilities. Hours documented in CASPA must be **completed** at the time of your CASPA application submission. Hours that you plan to obtain in the future *cannot* be counted toward your documented Patient Care Experience.

Please see the listed examples of Patient Care Experiences to determine whether the University of Bridgeport PA Program will accept them. These lists are intended as a guide and are not all-inclusive:

Examples of Experiences that **ARE** accepted as Direct Patient Care

For experience to be considered direct patient care”, it must involve hands-on contact with patients and/or high-level decision making in a medical environment. These experiences may be paid or volunteer.
